PROFESSIONAL SUMMARY

Technical Operations Manager in live mobile gaming, experienced in coordinating feature delivery across Product, Monetization, QA, and R&D. Strong fit for Product Owner roles that require structured specs, cross-functional execution, KPI follow-up, and fast product iteration.

PROFESSIONAL EXPERIENCE

SuperPlay - Dice Dreams

October 2024 - Present

Technical Operations Manager

- Coordinate live-game feature delivery across Product, Monetization, QA, and R&D teams.
- Turn priorities into structured deliverables, validation steps, and release-ready handoff materials.
- Support QA readiness through clearer checks, launch communication, and fast blocker handling.
- Track post-release KPIs, flag anomalies early, and drive follow-up actions with stakeholders.
- Improve recurring workflows to reduce friction and make execution more reliable.

SELECTED PROJECTS

- Lucky Tower - Designed a retention event concept with reward logic, KPI plan, and playable prototype.
- Draft21 - Built a snake-draft PWA that turns 21-player football team creation into a fast, fair flow.
- Merge Lab - Built a merge prototype with a live level editor and insights view for faster balancing.
- Inspector Pro - Shipped a workflow app used by a real company to replace a manual reporting flow.
