PROFESSIONAL SUMMARY

Technical Operations Manager in mobile gaming with hands-on experience leading live feature delivery, translating product goals into execution plans, and using KPI analysis to improve feature performance after launch. Combines operational ownership with product thinking across PRDs, experimentation, and cross-functional delivery.

PROFESSIONAL EXPERIENCE

Technical Operations Manager (Product & Delivery)

SuperPlay – Dice Dreams | Oct 2024 – Present

- Led end-to-end delivery of live-game features, aligning Product, Monetization, QA, and R&D to ensure smooth execution and on-time releases.
- Translated product goals into PRDs, user stories, validation flows, and A/B test plans, improving development clarity and reducing iteration cycles.
- Owned post-launch performance by tracking KPIs (SQL, dashboards), analyzing anomalies, and driving data-informed optimizations.
- Improved QA readiness and release processes, increasing product quality and reducing turnaround time on critical issues.
- Facilitated clear stakeholder communication, aligning priorities, timelines, and product expectations.
- Streamlined workflows to improve execution efficiency and reduce delivery friction.

Projects

- Lucky Tower – Designed a retention-driven live event, including reward mechanics, KPI framework, and prototype → focused on increasing engagement and session frequency.
- Merge Lab – Built a merge game prototype with a live editor and analytics view to support rapid balancing and product iteration.
- Beat Runner – Developed a gameplay prototype exploring progression systems, economy design, and difficulty tuning.
- Inspector Pro – Delivered a real-world workflow product replacing manual processes, improving operational efficiency for end users.
